

Low Cost UV Units

The steel cased LV models are the most cost effective UV units offered. The tubes are in base which means the artwork has to be registered on the UV sensitive area and then placed face down onto the exposure area. Coloured black, each unit has a pressure pad which, when the lid is held closed by the two retaining clips, acts to force the artwork and sensitive material firmly together on the UV illuminated area. All controls are conveniently front mounted. The LV202-E has a six minute mechanical timer which also acts as the mains switch. When the control knob is rotating to the required time the power is turned on and the exposure commences. The timer clicks off as soon as the exposure is completed. The LV204 controls consist of a 0 – 500 second digital timer that is set with touch keys. The set time counts down during exposure and then flashes to indicate the exposure is complete. Both UVs come complete with IEC socket and moulded 13 amp plug.

Model	Working Area	Timer	UV Output	Dimensions	Weight
LV204	14 x 10.25" 356 x 260mm	0 – 500 secs	4 x 15W	515 x 400 x 120mm	14.0Kg
